

# ONLINE WORKSHOP

## Teachers' Training Workshop On School Level Space and Astronomy

MAY 1-2, 2021.

### WORKSHOP DETAILS

This is an online training for two days which will empower school teachers with effective teaching aids on Space and Astronomy related topics in classrooms. Workshop will cover selected topics in Space and Astronomy from national and state education board curriculum (class 7-class 10). Resource training will involve talks by the experts along with sessions on hybrid learning.

There is no registration fee for the workshop. As there are limited slots available, preference will be given on first come first serve basis. E-certificates will be provided to participants.
